

**FPC2026**  
Future Propulsion Conference

# FPC2026 Student Competition

Are you a student, early career researcher or early career engineer\*<sup>1</sup> working in Automotive, Motorsport, Off-Road, E-Mobility or other transport related areas.

Come and attend one of the largest UK based conferences focussed on propulsion technologies: **The Future Propulsion Conference.**

**25<sup>th</sup> – 26<sup>th</sup> February 2026**

 **Seminars**  **Exhibition**  **Networking**

**National Motorcycle  
Museum, Solihull**

We are offering **TEN free tickets** for students and recent graduates available to anyone in the above categories who submits a **short 1-page essay** by the **end of November 2025** on their vision for what propulsion technologies will be like in 2050. These will be judged by the Scientific Advisory Board (the members of which are listed on the conference website).

We are also keen to give students, researchers or early career engineers the opportunity to **present**, and therefore welcome short abstracts for '3-minute pitch' style presentations<sup>\*2</sup>.

We are also happy to support educators, course coordinators, or team leaders from industry, who might want to bring a cohort to the conference.

Please get in touch as we are happy to create a bespoke package for you.

[Lynda@futurepowertrains.co.uk](mailto:Lynda@futurepowertrains.co.uk)

**\*1** Students must be registered at a higher education institution during the period of the conference. Early career researchers and engineers must have graduated with their latest qualification within the last 3 years (for example those who graduated in the summer of 2023 would be eligible, but those in the summer of 2022 would not). Get in touch if you are not sure.

**\*2** You can also submit a full abstract for a normal presentation too.

**Please note that overnight accommodation and travel is not included in the prize.**
